Dear Sheep Count Participant:

The information has been gathered and compiled for the sheep counts held in the northern and southern sectors of Anza-Borrego during June and July of 1981. This data is essential for sound management decisions that affect the preservation of bighorn sheep within the park. We are pleased to enclose the results from this year's counts.

Thank you for donating your effort and time to the desert bighorn. We appreciate the sacrifices that you have made in order to participate in the sheep counts. Be assured that your efforts have been worthwhile and your time well spent.

We look forward to seeing you again.

Our sincere thanks,

Anza-Borrego Staff
